Saab delivers fourth GlobalEye to the UAE

Saab has delivered another GlobalEye Airborne Early Warning and Control (AEW&C) aircraft to the United Arab Emirates (UAE), marking the delivery of the fourth advanced AEW&C aircraft to the UAE in just four years.

The delivery took place on 18 April 2024 and follows Saab's previous deliveries of three GlobalEye to the UAE in 2020 and 2021.

"I am proud to celebrate the fourth delivery of our world-leading AEW&C solution GlobalEye to the UAE and to continue supporting its operational availability and mission success. The high delivery pace in the GlobalEye programme is testament to our unique in-house capability which means we control the entire process, from development to integration," says Micael Johansson President and CEO of Saab.

The UAE has ordered a total of five GlobalEye aircraft from Saab, with the initial contract signed in 2015 and an order for two additional aircraft received in 2021.

GlobalEye is an advanced multi-domain AEW&C solution with an array of active and passive sensors that provide long-range detection and identification of objects in the air, at sea and over land. By providing real-time information to units in air forces, armies and navies, GlobalEye enables enhanced situational awareness of the surrounding areas and early detection of threats.
