FFV ORDNANCE

84 MM HEAT 655 CS

Armour destruction from confined space

**Increases effectiveness against armoured targets
in urban scenarios by firing from enclosed spaces**

The 84 mm HEAT 655 CS is designed to give a Carl-Gustaf® unit the ability to engage targets from confined space during urban warfare. The round is equipped with solid counter mass to reduce back blast and sound pressure.

The shaped-charge warhead is designed to create a high penetration in combination with a devastating behind-armour effect.
