FFV ORDNANCE

84 MM SMOKE 469C

Creating effective smoke

Instantly generate an effective smokescreen and produce fresh advantages in a variety of combat situations

The SMOKE 469C round for the Carl-Gustaf® M4 can be used by dismounted troops for a range of missions. The smoke round enables your unit to independently create their own smoke on the battlefield. Immediately upon hit, the shell bursts and instantaneously creates a smokescreen.

SMOKE 469C can be used effectively for the following missions: blinding, screening and spotting.

SMOKE 469C in screening mission

SCREENING

By firing SMOKE 469C, the dismounted soldiers can dispense a smokescreen between the enemy and their own position.

SPOTTING

For the spotting mission, the team can support other units by pointing out the targets with a SMOKE 469C.

SMOKE 469C in spotting mission

SMOKE 469C in blinding mission

BLINDING

When launching the round direct on the target, the enemy are blinded and the unit can gain important time.
