

SAAB

FFV ORDNANCE

AT4CS AST

Firepower made versatile

Confined-space capability – perfect for urban warfare

The AT4CS AST has confined-space capability and an integrated red dot sight. It can easily engage building structures and bunkers, even penetrating brick walls, including doubly reinforced concrete with rebars.

SAAB

FFV ORDNANCE

CLOSE-QUARTER COMBAT

Ideal for urban warfare, the weapon can defeat enemies behind concrete or brick walls and within field fortifications, create new points of entry, ensure structure demolition and defeat light-armoured vehicles.

EASE OF USE

The weapon has two operational functioning modes – impact and delay mode – with a switch on the weapon for delay or impact effect.

CONFINED-SPACE CAPABILITY

Designed according to the principle of countermass, the weapon can be fired from inside a room or from within a confined space.

24/7 CAPABILITY

Red dot sights with night vision goggles make the weapon suitable for day or night engagement.

Technical data

LENGTH	980 mm
WEIGHT	9.3 kg
TARGETS	Structures, bunkers and light-armoured vehicles
EFFECTIVE RANGE	200 m
