SAAB

**Innovative, deployable,
adaptable.**

Medical Care Solutions

A complete solution

Our Medical Care Solutions offer a range of capability modules to deliver comprehensive patient management and care.

Saab is leading a team of world class suppliers with global experience and expertise providing clinical care in challenging and unique settings.

We are a team with unparalleled experience in delivering and supporting deployable health projects. Our in depth experience provides infrastructure, project management, design and integration, medical equipment procurement, integrated logistics support, training and environmental analysis.

As the selected provider of deployable health solutions to the Australian Defence Force, the Saab-led team can deliver deployable field hospitals that are tailored to clinical requirements. These include central sterile supply department, dental, diagnostic imaging, intensive care, mobile computed tomography (CT) scanner, pathology, psychology, pharmacy, surgical theatre, trauma, triage and ward units.

A tailored solution with a flexible approach

Basic laboratory testing	Dental	ICU	Psychological first aid
Clinical laundry	HVAC	ISO 9001 certified	Triage/resuscitation
CSSD	Hygiene facility	Pharmacy	Ultrasound
Day surgery	Imaging/x-ray	Primary health care	Wards

Deployable, modular, scalable

Deployable field hospitals have a wide range of uses

- regional remote communities
- hospital refurbishments
- hospital surge management
- manage outbreaks
- isolation testing
- humanitarian and disaster relief

Global experience, advanced capability

Saab’s team of world-class suppliers have global experience and expertise providing clinical care in challenging and unique settings.

We have a proven capacity to work with governments and health organisations to provide customised healthcare delivery and support solutions that best meet their needs.

We deliver on infrastructure, project management, design and integration, procurement, integrated logistics support, training, environmental analysis and provide medical and resuscitative equipment.

A team with global experience

-  Australia
-  Afghanistan
-  Croatia
-  East Timor
-  Iraq
-  Kenya
-  Latvia
-  Norway
-  Papua New Guinea
-  Sierra Leone
-  Somalia
-  South Africa
-  Sudan
-  Sweden
-  United Kingdom

Our medical care solutions offer a highly adaptable life-saving capability that delivers and supports deployable military and humanitarian hospitals for use across the globe.

Modular flexibility

Saab’s deployable healthcare solutions are fully modular. Each module is adaptable and flexible, covering NATO Role 1 to NATO Role 3 and are tailored to each scenario.

- Role 1** Provides primary health care, triage, resuscitation and stabilisation.
- Role 2** Provides secondary health care including primary surgery, intensive care, nursed beds. Can also include pathology, advanced diagnostic imaging, dental, pharmacy, psychology and environmental health care capabilities
- Role 3** Provides comprehensive secondary health care including specialist surgery, major medical and nursing specialties, advanced diagnostics and advanced dental capabilities

Infrastructure characteristics

- Hung fabric and aluminium frame** With woven polyester PVC coated fabric and frame, the structure provides weather protection (wind, snow, rain, sand) as well as blackout protection.
- Thermal fly** The external solar shade reduces extreme radiant heat transfer to inside the structure.
- Inner liner** The insulated liner increases the level of thermal protection.
- CBRN colpro** The CBRN resistant inner liner and air filtration unit means this infrastructure can be used as a COLPRO shelter.

Accessories Accessories such as lights, electrical systems, plenums and partition curtains are designed for a global solution to reduce logistical challenges.

Our modular, deployable and scalable Medical Care Solutions offer a range of capability modules to deliver comprehensive patient management and care.
