

SAAB

FIBER OPTIC GYRO UNIT

8088 009-20X ONE/TWO/THREE-AXIS

The high performance alternative. Based on our Fiber Optic technology backed up by over 50-years' experience in inertial sensors.

This family of new generation Gyro Units is specifically designed for stabilization applications where there is a need for rate sensing. They offer a very attractive solution based on fiber optic gyro technology that gives a number of benefits. The units are equipped with Saab manufactured single axis Fiber Optic Gyros with built-in temperature sensor. They also include DC/DC converters, analog compensation electronics and filters to comply with international standards of EMI requirements. These units are available in single-axis, dual-axis and three-axis configuration.

Fiber Optic Gyro (FOG).

Stabilization of Remote Weapon Station with Saab FOG-Unit.

Applications:

- Gun stabilization
- Sight stabilization
- Antenna stabilization
- Camera stabilization

Features:

- Compensated analog output
- Solid state design
- Wide bandwidth
- High shock and vibration usability
- Very good bias stability
- Short start-up time

Company Background:

Saab has been a producer of gyros of various designs for over 50 years. Production was initially intended for Saab designed aircraft sight and missile requirements.

Since the end of 70's the gyro production have expanded into a product line of it's own including design and production of gyro products for worldwide customers. Up to the present time, we have produced more than 50.000 sensors. Gyros based on FOG technology has been the main product since the end of 90's.

Mechanical Gyros.

DIMENSIONAL DRAWING FOG UNIT 8088 009-20X

TYPICAL SPECIFICATION VERSION 8088 009-20X*

CHARACTERISTICS	UNIT	VALUE
Operating Range (OR)	°/s	±150
Tracking Range (TR)	°/s	±20
Bias at 20°C (initial cond.)	°/h max	100
Bias variation peak to peak over temperature range	°/h max	40
Bias stability at constant temperature	°/h max	5
Scale Factor Nominal at TR	mVDC/°/s	66.7
SF error at TR in room temperature	% of TR	±0.2
SF error at OR in room temperature	% of OR	±1.0
SF variation Over Temperature Range (@20°/s)	%	±0.3
Linearity error 0-20 °/s	% of TR	±0.1
Linearity error 20-150 °/s	% of OR	±3.0
Bandwidth	Hz min	100
Start up time	s max	1
Misalignment	mrad max	8
Output Load	kΩ	80

POWER REQUIREMENTS

Supply Voltage	VDC	+18 – +32
Input Power	W max	12

ENVIRONMENTS

Shock	g : msec	300 : 1
Vibration, sine	g : Hz	10 : 20-2000
Vibration, random	g ² /Hz : Hz	0.1 : 20-2000
Operating temperature range (OTR)	°C	-40 – +70
Storage temperature range	°C	-46 – +75

* Only as an example. Can be tailored to customer requirements.
