

Saab at Seoul ADEX 2021

Saab will attend the Seoul International Aerospace and Defence Exhibition (Seoul ADEX 2021), in Seoul, Republic of Korea, from 19 to 23 October. Please visit us in Hall B, Stand 19 (B19).

Seoul ADEX has always been an essential meeting-place for defense and aerospace in the Republic of Korea, and all across the Asia Pacific region. Saab is a long-term partner in the defense of Korea and has worked closely with national industry here for almost 20 years. Saab continues to explore new routes for partnership and progress in Korea to keep people and society safe, and further expand Korea's own base of independent technology and advanced capabilities.

“Saab is unique in Korea through our long-term presence built around technology transfer and industrial cooperation,” says Håkan Borin, Head of Saab Korea. “We are close to the customer thanks to our teams of local engineers who successfully manage and support critical national programs. We are already very active in the radar sector and I see more opportunities to expand this relationship in sensors, electronic warfare and ground combat systems, for example. There is also an important opportunity to work together on Saab's GlobalEye advanced AEW&C system; a next-generation strategic capability which can revolutionize Korea's ability to protect its territory in every domain.”

At Seoul ADEX 2021 Saab will exhibit products and solutions from our product portfolio across the air, land and maritime sectors. This will include:

GlobalEye, Saab's revolutionary multi-role airborne surveillance system. With its next-generation Erieye ER radar, advanced C4I and unique multi-mission/multi-sensor capabilities, GlobalEye combines the roles of airborne early warning and control, maritime patrol and ground surveillance all in a single solution. In production and proven in service, GlobalEye is at the heart of networked 21st Century air power.

SAAB

NEWS FROM SAAB

Advanced Radar Systems. Saab is one of the world's leading radar suppliers with more than 30 years of active electronically-scanned antenna (AESA) radar design experience. Since 2009 the Republic of Korea Army and Marines have protected the nation with Saab's Arthur mobile weapons-location radar system. Saab's radar family is constantly evolving to incorporate the very latest technology for multiple applications such as the Giraffe G1X and G4A radar systems.

Ground Combat Systems. Saab's Carl Gustaf M4, AT4 and NLAW are the global benchmark for lightweight infantry firepower. They are constantly evolving to defeat new threats and keep your soldiers one step ahead on the battlefield.

GlobalEye Next-Generation AEW&C for Korea

The GlobalEye system represents the future of AEW&C. GlobalEye goes beyond the limitations of today's aging, single-role, legacy platforms to open up a new world of multi-domain operations. GlobalEye is the smart solution for any nation that needs reliable, effective surveillance across air, land and sea. Join us for a presentation on how GlobalEye is the best option for Korea's future AEW requirements.

Please visit Saab during Seoul ADEX 2021, at Hall B, Stand 19
