Norwegian Armed Forces Place Order for Programmable Carl-Gustaf Round

Saab has received an order from the Norwegian Armed Forces for deliveries of ammunition for the recoilless Carl-Gustaf® rifle.

The order is signed within a 15-year framework agreement that allows the Norwegian Armed Forces to place orders for Carl-Gustaf ammunition and weapons. This includes the new programmable high explosive round HE 448, among other ammunition types. In January 2021, Norway became the 14th user of the latest Carl-Gustaf M4.

“We are pleased to continue to support the Norwegian Armed Forces with our Carl-Gustaf ammunition. These munitions will further strengthen Norwegian defence capability,” says Görgen Johansson, head of Saab’s business area Dynamics.

The programmable high explosive ammunition HE 448 gives the Carl-Gustaf operator the ability to quickly configure a chambered round. The wide range of ammunition available for Carl-Gustaf further strengthens the system’s tactical flexibility, enabling faster engagement, increased hit probability and greater effectiveness for soldiers.
