## Saab Receives Order for Production of Advanced Training Aircraft Fuselage Systems

Saab has received an award from Boeing for the production of advanced training aircraft aft fuselage systems. The order value for Saab is USD 71.2 million (approximately SEK 750 million).

The advanced training aircraft fuselage systems will be produced in Saab's new facility in West Lafayette, Indiana, and first deliveries to Boeing are planned for 2023.

"This is an important milestone and underscores that we are delivering on our commitments to our customers and the state of Indiana. This order will allow Saab to continue ramping up production and hiring in West Lafayette. We couldn't be more excited about this new chapter, and the future of our growing aerospace operations in Indiana," said Erik Smith, President and CEO of Saab in the U.S.
