Saab Receives Carl-Gustaf Ammunition Order from Lithuania

Saab has received an order from Lithuania's Defence Materiel Agency for Carl-Gustaf® ammunition. The order value is SEK 145 million and deliveries will start during 2024.

The order is placed within a framework agreement initially signed between Saab and the Swedish Defence Materiel Administration, which allows Lithuania, together with Latvia and Estonia, to place orders for Carl-Gustaf M4 weapons and ammunition during a ten-year period.

“We are pleased to receive an additional order from Lithuania and are ready to continue to deliver our world-leading ground combat capabilities to the customer,” says Görgen Johansson, head of Saab’s business area Dynamics.

Proven to deliver results on the battlefield, the Carl-Gustaf provides the effectiveness soldiers need. The wide range of ammunition types available for Carl-Gustaf makes it flexible and able to handle any situation on the battlefield, whether it is to destroy an armoured vehicle or structure, or illuminating the battlefield during night-time operations.
