Saab receives order for airborne early warning aircraft from Poland

Saab has received an order from Poland's Ministry of National Defence for two Saab 340 Airborne Early Warning (AEW) aircraft. The order value is approximately SEK 600 million and the contract period is 2023-2025.

These early warning systems comprise the Saab 340 aircraft equipped with Saab's advanced Erieye radar. The contract also includes ground equipment as well as in-country logistics and support services.

"Saab has had a strong relationship with the Polish Ministry of National Defence for many years. We are proud to further strengthen Poland's Armed Forces with our airborne early warning and network-based solutions," says Carl-Johan Bergholm, head of Saab's business area Surveillance.

Saab 340 AEW, together with associated ground equipment, provides a detailed situational picture that can be used for military and civilian tasks including air surveillance and rescue operations.

Different configurations of Saab's Erieye AEW/AEW&C system have been sold to nine countries, making it one of the most widely used airborne surveillance systems in the world.

Saab is a leading defence and security company with an enduring mission, to help nations keep their people and society safe. Empowered by its 19,000 talented people, Saab constantly pushes the boundaries of technology to create a safer, more sustainable and more equitable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
