Saab receives order for AT4 from NATO Support and Procurement Agency

Saab has received an order for the anti-armour weapon AT4 from the NATO Support and Procurement Agency (NSPA). The order value is approximately EUR 63 million (approximately SEK 700 million) and deliveries will take place 2026-2027. The order was booked in Q4 2023.

“Our AT4 stands out on the market as a highly sought-after and effective support weapon. We are honoured that the NSPA has trusted our products once again, and they can feel confident that they have a leading single-shot weapon that is robust and reliable,” says Görgen Johansson, head of Saab’s business area Dynamics.

The AT4 series comprises a selection of easily manoeuvrable, lightweight, and disposable weapons designed for straightforward operation by a single soldier. Capable of countering tanks, heavy combat vehicles, and threats within structures and fortifications, the AT4 also serves to safeguard fixed installations, supply points, and other critical assets.
