Saab and Radionix sign MoU for sensors and defence electronics

Saab and the Ukrainian defence company Radionix have signed a Memorandum of Understanding (MoU) regarding the intention to form a strategic collaboration relating to sensors and defence electronics, aiming to strengthen Ukraine's defence capabilities.

The collaboration aims to focus on areas within sensors and defence electronics development and maintenance across all domains, leveraging the strengths of both companies.

With its strong technology offer and proven track record of international collaboration, Radionix brings valuable know-how in areas such as radar and optical targeting equipment and is a central part of Ukraine's defence industrial base. Saab will contribute with its solid defence industry experience and expertise in these technology areas.

"We look forward to this collaboration with Radionix, leveraging both companies' expertise. This agreement underscores Saab's strong commitment to supporting Ukraine's defence capability and defence industry" says Anders Carp, Deputy CEO of Saab.

Saab is a leading defence and security company with an enduring mission, to help nations keep their people and society safe. Empowered by its 25,000 talented people, Saab constantly pushes the boundaries of technology to create a safer and more sustainable world. Saab designs, manufactures and maintains advanced systems in aeronautics, weapons, command and control, sensors and underwater systems. Saab is headquartered in Sweden. It has major operations all over the world and is part of the domestic defence capability of several nations.
