Press release 28 November 2026

Saab receives order from Ukraine for Giraffe 1X

Saab has signed a contract and received an order from the Ministry of Defence of Ukraine for Giraffe 1X systems for the Ukrainian Armed Forces. The order value amounts to EUR 450 million and deliveries will take place during 2027.

"I am truly proud that Sweden and Saab can offer the Giraffe 1X radar system to Ukraine. The system provides advanced air surveillance capabilities and will strengthen the country's ability to detect, track and classify a wide range of airborne threats. This will enhance situational awareness and support more effective air defence operations, says Micael Johansson, President and CEO of Saab.

Giraffe 1X is a high-performing 3D radar deployed in the Compact Radar Module (CRM) configuration. It is rapidly deployable and can be easily moved between different platforms. The system provides 360° air surveillance, detecting, tracking and classifying aircraft, missiles, RAM threats and drones, with updates every second, even in cluttered environments.
