

# INTELLECTUAL PROPERTY POLICY

Saab's intellectual property portfolio- consisting of both registered intellectual property assets, such as trademarks and patents, and unregistered intellectual property assets, such as copyright, know how and trade secrets- supports our business strategies and contributes to business opportunities and to the continued development, adaption and improvement of technologies and capabilities arising from Saab's operations on a global basis.

This will be achieved through:

- creating an awareness of intellectual property within the company group
- proactively protecting our intellectual property
- adapting Saab's intellectual property portfolio to business needs and matching it to actual product portfolio and focus technology areas
- monitoring and evaluating technology development within our scope of business with the aim to build an intellectual property portfolio that is relevant also in the future
- claiming ownership to innovations and knowledge proprietary to Saab, thereby strengthening our ability to control use of such innovations and capture the value of ideas and investments
- continuously evaluating Saab's existing intellectual property portfolio in order to identify and pursue business opportunities within alternative fields of use both inside and outside the company group
- managing and enforcing Saab's intellectual property rights in order to control legal risks
- protecting Saab's intellectual property rights against any misrepresentation and not tolerating any infringement or abuse thereof
- always respecting valid intellectual property rights belonging to third parties.

Micael Johansson  
President and CEO, Saab AB

*Saab serves the global market with world-leading products, services and solutions within military defence and civil security. Saab has operations and employees on all continents around the world. Through innovative, collaborative and pragmatic thinking, Saab develops, adopts and improves new technology to meet customers' changing needs.*
