## Defeating soft targets

Increased versatility against soft targets with impact detonation and air burst special features

Upon detonation, the HE 441D for the Carl-Gustaf® M4 releases approximately 800 steel ball bearings as an evenly distributed, highly lethal cloud. It can be fired to detonate on target with its mechanical impact fuse, or with time mode as an air burst above the target at required range.

# SAAB

HE 441D air burst on target

## AIR BURST

HE 441D provides dismounted soldiers with the capability to incapacitate personnel and thin-skinned vehicles using steel balls as well as shell body fragments. The operator selects air burst or impact mode prior to loading. It can also be fired through windows to engage the occupants of a structure.

## WORLDWIDE SERVICE

The HE 441D is a highly effective round providing a unique capability to the Carl-Gustaf® system worldwide.

Carl-Gustaf® M4

Effect from impact mode

## IMPACT

In impact mode the HE 441D can be used for a large range of missions.

## Technical data

Complete round weight	3.2 kg
Effective air burst range	1,250 m
Effective impact range	1,300 m

<b>Status</b>	Combat-proven
<b>Ammunition type</b>	Anti-personnel
<b>Warhead design</b>	Fragmentation
