84 MM ILLUM 545C

Fighting at night

Allow ground combat units to supply their own battlefield illumination and efficiently complete their missions

The 84 mm ILLUM 545C round for the Carl-Gustaf® M4 allows fighting units to rapidly supply their own battlefield illumination. The burst height is approximately 200 m, providing an illumination intensity of 650.000 cd for an average time of 30 seconds and covering an area 400 to 500 m in diameter.

SAAB

Range drum with luminous groove

EASY OPERATION

The sight's range adjuster features a special luminous groove to ensure the correct elevation for firing.

DAYLIGHT WITHIN SECONDS

The ILLUM 545C round is designed for quick illumination of target areas, making it possible to engage the enemy during darkness.

Continuous illumination
