FFV ORDNANCE

84 MM TP 552

Effective target training

Rocket-assisted target practice projectiles to enhance the capability of the user

The inert TP 552 projectile for the Carl-Gustaf® M4 is rocket assisted, which provides a flat trajectory and a short time of flight to the target. The projectile is fin-stabilised and rotates slowly in flight. The TP 552 has the same trajectory as the 84 mm HEAT 551.

Ready to fire TP 552

REALISTIC OPERATION

The 84 mm TP 552 round is externally similar to the shape of the 84 mm HEAT 551 round. The loading, aiming and firing operations are the same as when firing live Carl-Gustaf® ammunition.

LOW CONFLICT

The TP 552 is also beneficial for use during a low conflict scenario when less collateral damage is of importance.

Less lethal damage

Technical data

Complete round weight	3.2 kg
Effective range	700 m

Status	Fielded
Ammunition type	Full-calibre training
Warhead design	Inert
