

SAAB

84 MM ADM 401

Close-in protection

Made for close-in protection under all conditions, especially jungle or urban warfare

The ADM 401 for the Carl-Gustaf® M4 carries a payload of 1,100 flechettes and has an effective range of approximately 100 m.

Since there is no explosive charge, the flechettes are released by gas pressure.

The result is a distribution of 5 to 10 flechettes per square metre at a distance of 100 m, which is extremely effective against enemy intrusion.

CLOSE-IN PROTECTION

ADM 401 provides dismounted soldiers with close-in protection capabilities against enemy intrusion.

CLOSE COMBAT

ADM 401 is highly effective for close combat situations, such as jungle operations or other types of forested areas.

Two-man Carl-Gustaf® crew carrying ADM 401 ammunition

HIGH EFFICIENCY

Flechettes' dispersion at 100 m is approximately 10–12 m.

Target effect

Technical data

Complete round weight	2.7 kg
No. of flechettes approx.	1,100 m/s

Status	Combat-proven
Ammunition type	Close-in protection
Warhead design	Flechette
