

IDET 2025

Invitation

28 – 30 May | Brno Exhibition Centre

Hall P
Stand 076

Keeping people and society safe

In today's complex world, Saab's thinking edge provides the innovative and advanced technical solutions for the modern battlefield, to secure your operations. Saab continuously develops, adapts and improves new technology to meet customers' changing needs. In the Czech Republic, Saab has been actively engaged in business activities and collaborates with local partners in the defence industry. Over the years, Saab has established a strong installed base in the country, driven by its advanced, high-quality products that contribute to enhancing national security.

“Join us at IDET 2025 to learn about Saab's offerings and discover how our extensive portfolio provides forces with a tactical advantage against any threat.”

Krasimira Stoyanova
Head of Czech Republic & RoEE

Ground Combat Preparing forces for tomorrow's threats

The Carl-Gustaf® M4 system, is a man-portable, multi-role weapon system with a wide range of ammunition types, making it suitable for a variety of tasks. The best-in-class NLAW Next generation Light Anti-tank Weapon effectively eliminates even the most advanced tanks, including in built-up areas. Combat-proven across the world, the AT4 weapons are light-weight, single-shot, and fully disposable.

Ground Combat Trainers The future of military training

Through innovative use of technology and a well-proven training philosophy, Saab offers world-leading training solutions and capabilities enabling interoperability and true realism for land forces. Experience Saab's indoor and outdoor training systems at IDET 2025. Try and test the ground combat indoor trainer in a studio setup, along with simulators for the Carl-Gustaf® M4 Weapon system. Live training equipment for soldiers and vehicles will also be on display.

TactiGuard XD Adapts to any environment

Tactical missions require warfighters to share and access information across networks with different security classifications. TactiGuard XD is a Common Criteria certified Cross Domain Solution enabling secure information sharing between higher classified up to secret and lower classified or unclassified systems. TactiGuard offers broad utility, being adaptable for use across land, air, and naval domains.

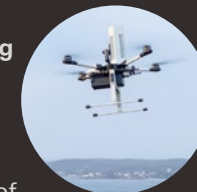

Giraffe 1X Creating time to act

The high-resolution 3D lightweight multi-mission surveillance radar Giraffe 1X is a flexible solution, enabling detection of stationary and rotary wing targets, high-speed missiles and RAM targets, as well as small UAVs in highly cluttered environments.

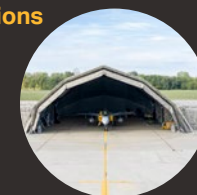

Sirius Compact Broaden your sensing horizon

The Sirius Compact is a modular, scalable, and portable system of passive sensors capable of detecting electromagnetic emissions. Due to its low size, weight and power, it can be mounted on a multitude of platforms including drones, vehicles, vessels and masts. At IDET 2025 we will showcase the Sirius Compact drone solution, demonstrating its advanced capabilities in detecting electromagnetic emissions while mounted on a light and versatile UAV platform.

Mobile Hangar Solutions Multispectral protection

Saab's Deployable Maintenance Facility provides troops with a comprehensive mobile maintenance capability, which increases operational readiness. The solution is modular and ready for use in less than 48 hours, suitable for any topographical and climatic zone with maximum operational flexibility.

Tactical Electronics Another level of rugged

Saab offer a wide range of rugged vehicle electronics Vetronics. High performance solutions which meet the harsh environmental requirements on the battlefield while keeping lifecycle costs to a minimum. Whether your need is minimum space or maximum capability, we provide a rugged system that meets your exact application and secures your operational capabilities.

Outdoor Area

Deployable Healthcare Saving lives 24/7

Deployable Healthcare DHC solutions have to meet a number of requirements. Saab's DHC solution are cost-effective, flexible and highly deployable. Adapted to fit the requirements of any mission, our solutions are suitable for a range of applications. The units are modular and fully interoperable with Nordic and NATO forces. At IDET 2025, we will display a full setup of the Role 2F concept, providing lifesaving capabilities including resuscitation, surgery, and a ward unit, able to manage six patients for up to 72 hours.
