## BARRACUDA PERSONAL NET

# Unbeatable, flexible protection

Customisable protection for  
individuals, in all conditions

Adaptable personal camouflage is vital for soldiers in all environments. The lightweight Barracuda Personal Camouflage Net is customisable to suit all conditions, providing perfect protection anywhere.

Armed forces today have to be prepared for operations in a wide range of environments, with constantly changing threats and intensity. The Personal Camouflage Net is designed with flexible personal use in mind to meet these challenges; it is lightweight, durable and easy to carry and use, providing readily available multispectral protection whenever necessary. The colours and patterns are fully customisable to match any terrain, providing protection anywhere.

- Lightweight
- Strong, 'Non-snagging' construction
- Water-repellent
- Fully customisable
- Capabilities: VIS, NIR, TIR

# SAAB

## TAKE CONTROL

The Personal Camouflage Net is lightweight and easy to carry, and fast and easy to use when the need arises. It has multispectral characteristics and provides protection in the visual, near infrared and thermal wavelength bands.

## SMART DESIGN

The Personal Camouflage Net is designed with individual use in mind – it is easy to use and carry, weighing approximately 200 g/m<sup>2</sup>. The material blocks up to 70 percent of the thermal energy transmitted by the soldier. The visual and near-infrared colour pigments and pattern are developed to blend into any intended environment. Patterns, colours and sizes can be fully customised according to the customer's requirements.

## MATERIAL

The Personal Camouflage Net is composed of two layers – a non-snagging base fabric and an incised garnish material, which provides the three-dimensional surface structure. This strong construction ensures easy handling and a long service life. The Personal Camouflage Net is water repellent and stays ultra-lightweight even when used in humid or wet weather conditions.

## Operational advantages

- Colours and patterns can be adapted for any terrain
- Easy to carry and transport
- Water repellent for use in all weather conditions
- Strong, non-snagging construction for long service life and high performance
- Multispectral protection

## Specifications

The Personal Net offers protection in the following (wavelength) areas:

Visual (VIS)

Near infrared (NIR)

Thermal infrared (TIR)
