

FEINDEF 2025

# Invitation

12 – 14 May | IFEMA Madrid

Hall 10  
Stand F11

## Keeping people and society safe

In today's complex world, Saab's thinking edge provides the innovative and advanced technical solutions for the modern battlefield, to secure your operations. Saab continuously develops, adapts and improves new technology to meet customers' changing needs. Join us at FEINDEF 2025 to learn about Saab's offerings and discover how our extensive portfolio provides forces with a tactical advantage against any threat.

### T-7A

#### Most advanced pilot training system

The T-7 training aircraft from Boeing and Saab is not only the newest, but also the most powerful jet trainer on the market. T-7 was developed with maintenance in mind to reduce cost and complexity. Integrated logistical support, both on and off the aircraft, as well as high reliability and availability will minimise lifecycle cost of the entire T-7 system.

### Ground Combat

#### Preparing forces for tomorrow's threats

The Carl-Gustaf® M4 system, is a man-portable, multi-role weapon system with a wide range of ammunition types, making it suitable for a variety of tasks. The best-in-class NLAW Next generation Light Anti-tank Weapon effectively eliminates even the most advanced tanks, including in built-up areas. Combat-proven across the world, the AT4 support weapons are lightweight, single-shot, and fully disposable.

### Training & Simulation

#### Train as you fight

Saab's live training simulator systems provide everything needed for swift analysis and evaluation of soldier skills and tactical behaviour. The system is modular and scalable to support all exercises and levels. It can be used for individual, squad or platoon levels up to and beyond brigade combat team level. The live training offer includes Military Operations in Urban Terrain, gunnery training, combat support, C-IED, medical, CBRN, and Live, Virtual, Constructive training integration.

### Arthur

#### Counter-battery-freedom of manoeuvre

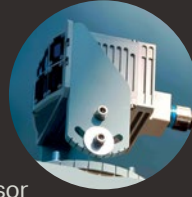

With a sustained capacity for handling multiple targets simultaneously, weapon locating system Arthur is a powerful asset when deployed close to the forward line of own troops. It is made to give the commander freedom of manoeuvre and enables quick counter-fire, making the threat the target, in no time.

### Naval Laser Warning System

#### Enhancing situational awareness

Naval Laser Warning System NLWS is a vital component of a vessel's combat suite sensor capability, providing real time situational awareness of laser-based threats. NLWS provides vital situational information to the command team, enhancing their tactical picture and alerting them to the presence of laser activity.

### CB90 Next Generation

#### Proven design and operational success

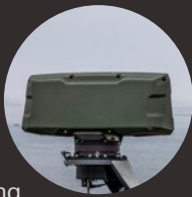

The Combat Boat CB90 has been built and delivered to customers around the world for 35 years. The CB90 is a versatile, fast and highly maneuverable vessel for amphibious operations and the transport of troops and equipment. The added value of this vessel lies in its robustness, speed and flexibility.

### Giraffe 1X

#### Creating time to act

The high-resolution 3D lightweight multi-mission surveillance radar Giraffe 1X is a flexible solution, enabling detection of stationary and rotary wing targets, high-speed missiles and RAM targets, as well as small UAVs in highly cluttered environments. At FEINDEF 2025, Saab will showcase a full-scale Giraffe 1X model, highlighting its advanced capabilities and cutting-edge technology.

### Flight Control Systems

#### Safety Assured

Saab provides equipment for both primary and secondary flight control systems including fault tolerant electromechanical actuation EMA solutions. Based on 80 years' experience of flight control systems and equipment both as aircraft OEM and system supplier. Saab provides the complete system from cockpit controls through safety-critical control computers and motor control electronics to electromechanical actuators.

### Double Eagle Family

#### With safety in mind

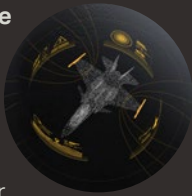

The Double Eagle family ensures safe, cost-efficient and reliable mine counter-measures operations. At FEINDEF 2025, Saab will display Double Eagle SAROV which can be operated both as an AUV for detection and classification, and as a ROV for identification and mine disposal.

### Arexis

#### Armed with confidence

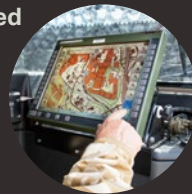

Arexis is rapidly emerging as Europe's preferred electronic warfare suite, offering unparalleled abilities for remaining undetected when entering hostile airspace. Its advanced escort capabilities ensure a tactical advantage by providing comprehensive situational awareness, detection and countering.

### Tactical Electronics

#### Another level of rugged

Saab offer a wide range of rugged vehicle electronics Vetronics. High performance solutions which meet the harsh environmental requirements on the battlefield while keeping lifecycle costs to a minimum. Whether your need is minimum space or maximum capability, we provide a rugged system that meets your exact application and secures your operational capabilities.

### SeaEye Falcon

#### Commercial under-water vehicle

The Falcon is the most successful under-water electric robotic system of its class and is proven in numerous intricate and demanding missions across many commercial, security and scientific sectors. SeaEye Falcon provides exceptional vehicle control and diagnostic data as well as the ability to customize the pilot display and enable features such as station keeping.
