

SAFE: COMMAND. CONTROL. COMMUNICATION.

Unified Situational Awareness

The changing nature of the threat landscape, combined with rapid, digital transformation, requires Public Safety agencies to be one step ahead. Through its SAFE platform, Saab is providing a modern, agile solution to meet tomorrow's challenges.

SAFE is a role-based, situational awareness platform that provides seamless information sharing between varied levels of users, designed to meet the ever-changing demands of day-to-day operations.

SAFE is a COTS platform—comprehensive and fully integrated next generation solution. It equips field operators and administrators with powerful decision support, smart resource management and an effective, common operational picture.

The unified platform enhances situational awareness, increases security, improves business flows, reduces costs and radically strengthens operational capabilities.

SAFE allows people and organizations to create efficient workflow throughout any process or event. The system can be continuously upgraded and configured to meet operational needs.

- Proven unified platform for control rooms
- Integrated solution for superior situational awareness
- Multi-channel public contact
- Consistent role-based graphical interface
- Supports agile adoption to new workflows and technologies

SAAB

COMMAND

- Role-based workflows with configurable rule engine provides a flexibility to adjust and expand the system.
- Multiple levels of command for secure information distribution.
- With integration to multiple data sources, SAFE facilitates seamless information flow to staff, making incident management process more efficient.

CONTROL

An ultimate, unified control-room experience based on:

- Workflow focus – managing end-to-end information flows
- User friendly, consistent UI with role-based layout
- Real-time Business Intelligence
- Flexible and configurable integrated solution
- Dynamic decision support
- GIS oriented presentation

COMMUNICATION

- Integrated multi-channel communication for seamless interaction with any resource.
- Bi-directional social media integration enables real-time Business Intelligence and communication.
- Instant and secure media sharing among stationary and mobile devices through apps and web.

Integration is in our DNA

The power of an open platform

Integration is both complex and expensive. With SAFE, operations are streamlined and future-proofed. Its open eco-system enables access and versatility. Any addition (present as well as future ones) can easily be tailored to precise specifications and needs.

Doing more with less

Command and control centers often operate using several disparate systems—communication, mapping, CAD and more. SAFE integrates all disparate systems, enabling operators to work more efficiently and do more with less.
