

SAAB

S1000D SERVICES

Saab offers scalable S1000D solutions, ranging from complete turn-key solutions to specific tasks.

S1000D is an international specification for the procurement and production of Technical Information. It covers the management, planning, production, exchange and distribution of Technical Information throughout the life cycle of products. S1000D utilizes production of data in modular form, which enables the re-use of information. S1000D was initially developed for military aviation, but usage since then has expanded to other fields within both the military and civil domains.

Our solutions encompass every phase of a project, from the development of the concept and Business Rules, to the setup of the production environment and processes, to the authoring of technical information. In addition, Saab provides customized training courses and solutions for the conversion of information from various formats to S1000D. Our renowned experts can help you to maximise the financial and technical benefits of using S1000D.

Saab has extensive experience in of applying various issues of S1000D in civil and military projects within the aerospace, land and naval domains.
